Safety Data Sheet

0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in

NITROGEN

Date of first issue: 06/08/2010

Revised date: 10/11/2021

SDS reference: 50015

Version: 5.0

Warning

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier	
SDS no	: 50015
1.2. Relevant identified uses of	the substance or mixture and uses advised against
Relevant identified uses	: Industrial and professional use for chemical analysis, calibration, (routine) quality control, laboratory use, under controlled conditions
Uses advised against	: Consumer use. Uses other than those listed above are not supported, contact your supplier for more information on other uses.
1.3. Details of the supplier of the	e safety data sheet
Company identification	: Air Liquide Australia Limited
	Level 12 / 600 St. Kilda Road
	3004 Melbourne VIC Australia
	+61 3 9697 9888
	ALAEnquiries@AirLiquide.com
1.4. Emergency telephone numl	ber
Emergency telephone number	: 1800 812 588

SECTION 2: Hazards identification

Air Liquide

Classification of the substance or mixture <u>2.1.</u>

Classification according to WHS Regulation

.		
Physical hazards	Gases under pressure : Compressed gas	H280

2.2. Label elements

Classification according to WHS Regulation

Hazard pictograms

Signal word Hazard statements

GHS04 : Warning

: None. EN (English)

: H280 - Contains gas under pressure; may explode if heated..

Precautionary statements

- Storage : P410+P403 - Protect from sunlight. Store in a well-ventilated place..

<u>2.3.</u> Other hazards

Air Liquide Australia Limited	
Level 12 / 600 St. Kilda Road	3004
Melbourne VIC Australia	
+61 3 9697 9888	

0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in NITROGEN

Reference number: 50015

Not classified as PBT or vPvB. The substance/mixture has no endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

3.1. Substances : Not applicable

3.2. Mixtures

Name	Product identifier	%	Classification according to WHS Regulation
Carbon dioxide	(CAS-No.) 124-38-9 (EC-No.) 204-696-9 (EC Index-No.) (REACH-no) *1	0.005 – 50	Press. Gas (Liq.), H280
Nitrogen	(CAS-No.) 7727-37-9 (EC-No.) 231-783-9 (EC Index-No.) (REACH-no) *1	Balance	Press. Gas (Comp.), H280
Oxygen	(CAS-No.) 7782-44-7 (EC-No.) 231-956-9 (EC Index-No.) 008-001-00-8 (REACH-no) *1	≤ 23.5	Ox. Gas 1, H270 Press. Gas (Comp.), H280
Methane	(CAS-No.) 74-82-8 (EC-No.) 200-812-7 (EC Index-No.) 601-001-00-4 (REACH-no) 01-2119474442-39	≤ 2.5	Flam. Gas 1A, H220 Press. Gas (Comp.), H280

Full text of H- and EUH-statements: see section 16

Contains no other components or impurities which will influence the classification of the product.

*1: Listed in Annex IV / V REACH, exempted from registration.

*3: Registration not required: Substance manufactured or imported < 1t/y.

SECTION 4: First aid measures

4.1. Description of first aid measures			
- Inhalation	: Adverse effects not expected from this product.		
- Skin contact	: Adverse effects not expected from this product.		
- Eye contact	: Adverse effects not expected from this product.		
- Ingestion	: Ingestion is not considered a potential route of exposure.		
4.2. Most important symptoms and effects, both acute and delayed			
	: See section 11.		

4.3. Indication of any immediate medical attention and special treatment needed

: None.

SECTION 5: Firefighting measures

- Suitable extinguishing media	 Water spray or fog. Product does not burn, use fire control measures appropriate for the surrounding fi Do not use water jet to extinguish. 		fire.
- Unsuitable extinguishing media			
5.2. Special hazards arising from	the substance or mixture		
Specific hazards	: Supports combus Exposure to fire n	ion. ay cause containers to rupture/explode.	
Hazardous combustion products	: None.		
Air Liquide Australia Limited Level 12 / 600 St. Kilda Road 3004 Melboure VIC Australia	EN (English)	Reference number: 50015	2/9

Air Liquide	0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in NITROGEN Reference number: 50015
5.3. Advice for fire-fighters	
Specific methods	 Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems. If possible, stop flow of product. Use water spray or fog to knock down fire fumes if possible. Move containers away from the fire area if this can be done without risk.
Special protective equipment for fire fighters	 Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters. Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask. Standard EN 469 - Protective clothing for firefighters. Standard - EN 659: Protective gloves for firefighters.
Hazchem Code	: 2TE
SECTION 6: Accidental release mea	isures
6.1. Personal precautions, protective e	guipment and emergency procedures
	 Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous. Act in accordance with local emergency plan. Stay upwind.
6.2. Environmental precautions	
	: None.
6.3. Methods and material for containm	ient and cleaning up
	: None.
6.4. Reference to other sections	
	: See also sections 8 and 13.
SECTION 7: Handling and storage	

7.1. Precautions for safe handling

Safe use of the product

The product must be handled in accordance with good industrial hygiene and safety procedures.
Only experienced and properly instructed persons should handle gases under pressure. Consider pressure relief device(s) in gas installations.
Ensure the complete gas system was (or is regularily) checked for leaks before use.
Do not smoke while handling product.
Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.
Use only oxygen approved lubricants and oxygen approved sealings.
Avoid suck back of water, acid and alkalis.
Do not breathe gas.
Avoid release of product into atmosphere.

O Air Liquide	0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in NITROGEN Reference number: 50015
Safe handling of the gas receptacle	 Refer to supplier's container handling instructions. Do not allow backfeed into the container. Protect containers from physical damage; do not drag, roll, slide or drop. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use. If user experiences any difficulty operating valve discontinue use and contact supplier. Never attempt to repair or modify container valves or safety relief devices. Damaged valves should be reported immediately to the supplier. Keep container valve outlets clean and free from contaminants particularly oil and water. Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment. Close container valve after each use and when empty, even if still connected to equipment. Never attempt to transfer gases from one cylinder/container to another. Never use direct flame or electrical heating devices to raise the pressure of a container. Do not remove or deface labels provided by the supplier for the identification of the content of the container. Suck back of water into the container must be prevented. Open valve slowly to avoid pressure shock.
7.2. Conditions for safe storage, inclu	uding any incompatibilities : Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling over. Stored containers should be periodically checked for general condition and leakage. Keep container below 50°C in a well ventilated place. Store containers in location free from fire risk and away from sources of heat and ignition. Keep away from combustible materials.
7.3. Specific end use(s)	: None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in NITROGEN			
OEL : Occupational Exposure Limits			
Australia	OES TWA [1]	9000 mg/m ³ Carbon Dioxide	
	OES TWA [2]	5000 ppm Carbon Dioxide	
	OES STEL	54000 mg/m ³ Carbon Dioxide	
	OES STEL [ppm]	30000 ppm Carbon Dioxide	

DNEL (Derived-No Effect Level) : No data available.

PNEC (Predicted No-Effect Concentration) : No data available.

8.2. Exposure controls

8.2.1.	Appropriate engineering controls			
	:	Provide adequate general and local exha Systems under pressure should be regul Ensure exposure is below occupational e Consider the use of a work permit system	arily checked for leakages. xposure limits (where available).	
8.2.2.	Individual protection measures, e.g. pe	ersonal protective equipment		
	:			risks
• Eye/fac	e protection :	Wear safety glasses with side shields. Standard EN 166 - Personal eye-protection	on - specifications	
• Skin pro	otection			
	Australia Limited 600 St. Kilda Road 3004	EN (English)	Reference number: 50015	4/9

O Air Liquide	0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in NITROGEN
	Reference number: 50015
- Hand protection	 Wear working gloves when handling gas containers. Standard EN 388 - Protective gloves against mechanical risk.
- Other	: Wear safety shoes while handling containers. Standard EN ISO 20345 - Personal protective equipment - Safety footwear.
Respiratory protection	 Gas filters may be used if all surrounding conditions e.g. type and concentration of the contaminant(s) and duration of use are known. Use gas filters with full face mask, where exposure limits may be exceeded for a short-term period, e.g. connecting or disconnecting containers. Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask. When indicated by a risk assessment, Respiratory Protective Equipment must be used. The selection of the Respiratory Protective Device (RPD) must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected RPD. Gas filters do not protect against oxygen deficiency. Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmospheres. Standard EN 14387 - Gas filter(s), combined filter(s) and standard EN136, full face masks . Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.
Thermal hazards	: None necessary.
8.2.3. Environmental exposure controls	

: None necessary.

SECTION 9: Physical and chemical properties

Information on basic physical and chemical properties <u>9.1.</u>

Appearance		
Physical state at 20°C / 101.3kPa	: Gas.	
• Colour	 Mixture contains one or more component(s) which have the following colour(s): Colourless. 	
Odour	: Odourless.	
Odour threshold	: Odour threshold is subjective and inadequate to warn of overexposure.	
pH value	: Not applicable for gas mixtures.	
Molar mass	: Not applicable for gas mixtures.	
Melting point	: Not applicable for gas mixtures.	
Boiling point	: Not applicable for gas mixtures.	
Flash point	: Not applicable for gas mixtures.	
Evaporation rate (ether=1)	: Not applicable for gas mixtures.	
Flammability range	: Non flammable.	
Vapour pressure [20°C]	: Not applicable.	
Vapour pressure [50°C]	: Not applicable.	
Relative density, gas (air=1)	: Heavier than air.	
Solubility in water	: No data available	
Partition coefficient n-octanol/water [log Kow]	: Not applicable for gas mixtures.	
Auto-ignition temperature	: Non flammable.	
Decomposition point [°C]	: Not applicable.	
Viscosity [20°C]	: Not applicable.	
Explosive Properties	: Not applicable.	
Oxidising Properties	: Not applicable.	
9.2. Other information		
Other data	· Gas/vapour beavier than air. May accumulate in confined spaces, particularly at or below	N

: Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

Reference number: 50015

SECTION 10: Stability and reactivity

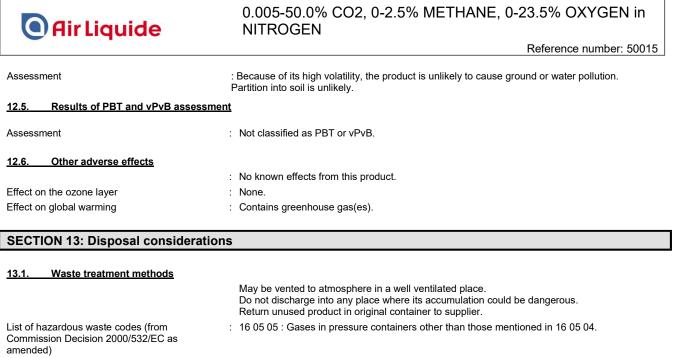

<u>10.1.</u>	Reactivity	
		: Data for mixture are not available
<u>10.2.</u>	Chemical stability	
		: Stable under normal conditions.
10.3.	Possibility of hazardous reactions	
		: No additional information available
10.4.	Conditions to avoid	
		: Avoid moisture in installation systems.
10.5.	Incompatible materials	
10101	<u>meompatible materiale</u>	: For additional information on compatibility refer to ISO 11114.
10.6.	Hazardous decomposition products	
10.6.		: Under normal conditions of storage and use, hazardous decomposition products should not be
		produced.

SECTION 11: Toxicological information

11.1. Information on toxicological effe	cts
Acute toxicity	: No toxicological effects from this product.
Skin corrosion/irritation	: No known effects from this product.
Serious eye damage/irritation	: No known effects from this product.
Respiratory or skin sensitisation	: No known effects from this product.
Germ cell mutagenicity	: No known effects from this product.
Carcinogenicity	: No known effects from this product.
Toxic for reproduction : Fertility	: No known effects from this product.
Toxic for reproduction : unborn child	: No known effects from this product.
STOT-single exposure	: No known effects from this product.
STOT-repeated exposure	: No known effects from this product.
Aspiration hazard	: Not applicable for gases and gas mixtures.
Other information	: For more information, see 'EIGA Safety Info 24: Carbon Dioxide, Physiological Hazards' at www.eiga.eu. Unlike simple asphyxiants, carbon dioxide has the ability to cause death even when normal oxygen levels (20-21%) are maintained. 5% CO2 has been found to act synergistically to increase the toxicity of certain other gases (CO, NO2). CO2 has been shown to enhance the production of carboxy- or met-hemoglobin by these gases possibly due to carbon dioxide's stimulatory effects on the respiratory and circulatory systems. The substance/mixture has no endocrine disrupting properties.

SECTION 12: Ecological information

Assessment <u>12.4. Mob</u>			
	<u>pility in soil</u>		
	sility in soil	: No data available.	
Assessment 12.3. Bioa	accumulative potential	: No data available.	
	sistence and degradability		
Assessment		: Classification criteria are not met.	
<u>12.1. Toxi</u>	icity		

13.2. Additional information

: None.

External treatment and disposal of waste should comply with applicable local and/or national regulations

SECTI	SECTION 14: Transport information		
<u>14.1.</u>	UN number		
UN-No.		: 1956	
<u>14.2.</u>	UN proper shipping name		

Transport by road/rail (ADR/RID)

Transport by sea (IMDG)

<u>14.3.</u>

Labelling

Transport by air (ICAO-TI / IATA-DGR)

Transport hazard class(es)

: COMPRESSED GAS, N.O.S. (Carbon dioxide, Nitrogen)

: Compressed gas, n.o.s. (Carbon dioxide, Nitrogen)

: COMPRESSED GAS, N.O.S. (Carbon dioxide, Nitrogen)

2.2 : Non-flammable, non-toxic gases

Emergency Schedule (EmS) - Fire	: F-C
Class / Div. (Sub. risk(s))	: 2.2

	, 3

O Air Liquide	0.005-50.0% CO2, 0-2.5% METHANE, 0-23.5% OXYGEN in NITROGEN
	Reference number: 50015
Emergency Schedule (EmS) - Spillage	: S-V
14.4. Packing group	
Transport by road/rail (ADR/RID)	: Not applicable
Transport by air (ICAO-TI / IATA-DGR)	: Not applicable
Transport by sea (IMDG)	: Not applicable
14.5. Environmental hazards	
Transport by road/rail (ADR/RID)	: None.
Transport by air (ICAO-TI / IATA-DGR)	: None.
Transport by sea (IMDG)	: None.
14.6. Special precautions for user No additional information availablePacking Instruction(s)	. 5000
Transport by road/rail (ADR/RID) Transport by air (ICAO-TI / IATA-DGR)	: P200
Passenger and Cargo Aircraft	: 200
Cargo Aircraft only	: 200
Transport by sea (IMDG)	: P200
Special transport precautions	 Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers: Ensure there is adequate ventilation. Ensure that containers are firmly secured. Ensure valve is closed and not leaking. Ensure valve outlet cap nut or plug (where provided) is correctly fitted. Ensure valve protection device (where provided) is correctly fitted.
HAZCHEM CODE	: 2TE

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

: Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations

Ensure all national/local regulations are observed.

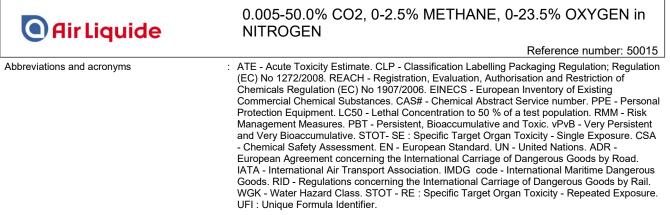

15.2. Chemical safety assessment

: A CSA does not need to be carried out for this product.

SECTION 16: Other information

Indication of changes

: Revised safety data sheet in accordance with commission regulation (EU) No 453/2010.

Training advice

: None.

Full text of H-statements

Flam. Gas 1A	Flammable gases, Category 1A
H220	Extremely flammable gas.
H270	May cause or intensify fire; oxidiser.
H280	Contains gas under pressure; may explode if heated.
Ox. Gas 1	Oxidising Gases, Category 1
Press. Gas (Comp.)	Gases under pressure : Compressed gas
Press. Gas (Liq.)	Gases under pressure : Liquefied gas

DISCLAIMER OF LIABILITY

: Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out. Details given in this document are believed to be correct at the time of going to press.

Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.

End of document
